Intelligent Carpooling System - A
Case Study for Bacau Metropolitan
Area

Constantin-Sebastian Dămian

Dev lead @ Endava
Bucharest Metropolitan Area

Summary

Experienced Software Engineer with a demonstrated history of
working in industries like automotive, telecom, R&D. Skilled in
Python, jQuery, Databases, APIs, CryptoCurrencies and many other
cool things. Strong engineering professional with a master's degree
in Informatics focused on Applied Informatics in Science, Technology
and Education from „Vasile Alecsandri" University of Bacău.

Experience

Endava
Development Consultant with Python
September 2022 - Present (3 months)
București, România

Leading a development team which contributes to a state of the art project
regarding satelite communications using Python 3, Go, Ansible, Jenkins,
Docker, Github, CircleCI, OpenAPI, Swagger, nginx, mqtt, InfluxDB, Kapacitor,
and many other interesting technologies.

Școala Gimnazială „Ioan Bădescu"
Teacher
September 2022 - Present (3 months)
Popești Leordeni, Ilfov, România

Luxoft
5G Core Developer with Python
July 2019 - August 2022 (3 years 2 months)
Bucharest, Romania

Developing state of the art components and test applications for 5G network
using Async Python 3, Docker, Gitlab, InfluxDB, Grafana, Selenium, Redis and
other cool stuff.

Orange Services
Fullstack Developer with Python
November 2018 - July 2019 (9 months)

Bucharest, Romania

I'm developing an application of cloud management built over OpenStack and Openshift using Python, Angular, Django, DjangoRestFramework, Git & Gerrit & GitLab, Jenkins, JIRA, Docker, Linux and many other cool stuff.

Lampix
Backend Software Developer with Python
June 2018 - October 2018 (5 months)
Brașov

I was developing some APIs used for managing our Lampix devices using Python as a programming
language and so many cool things like aiohttp, marshmallow, yoyo, Postgres, Docker, cryptocurrencies. I had a little to deal with Solidity in the process of understanding code written for blockchain.

Mondly
Big Data Software Developer with Python
February 2018 - May 2018 (4 months)
Brașov

I was developing a Python application for analytics using Django as framework, MongoDB as NoSQL database, MongoDB aggregations for data interpreting, HTML/CSS/JS for interface.

Continental
Full Stack Developer with Python
January 2017 - February 2018 (1 year 2 months)
Iași

I was helping with the develop of a big data analyzing application that creates reports with data from our tools used in the development workflow. My main responsibilities included working on the back-end components writing Python code using Django framework and also on the front-end parts using HTML, CSS, JS, jQuery, AJAX, Bootstrap and other JS libraries.
I was participating in writing and maintaining libraries for getting data out of our tools (wrappers for REST API services of the tools we use, also in Python) and also I did code reviews for the changes in our projects.

GfK
IronPython Programmer
January 2016 - December 2016 (1 year)
Iași

I worked mostly with regular expressions, Python and C# scripts (combined with IronPython), SQL queries on Microsoft SQL Servers, CSS selectors, JavaScript and the Microsoft Office suite (Word, Excel, Outlook). The main features developed here were web crawlers and bypassing the blocking methods of websites.

WebLauncher
PHP Web Developer
December 2013 - October 2015 (1 year 11 months)
Buhuși

I was creating and maintaining web modules on many websites, back-end and front-end using PHP, HTML, CSS, JS, jQuery, Bootstrap, Smarty templates, SQL queries and also personalized REST API.
